

CHOOSE WISELY.

Over the past decade, Kallion Farms has taken advantage of some of the most cutting edge genomic technologies to develop a breeding program that produces a beef animal that is both efficient and possesses carcass traits, such as marbling and tenderness, the marketplace demands.

Kallion Farms brahman cattle are what the commercial cattleman needs in order to add economically beneficial traits such as feed efficiency, hardiness and milk production to their *Bos taurus* based herds and still keep the same carcass traits the market demands. For years we have tested our cattle to provide a scientifically proven product you can rely upon. Quality, consistency, efficiency and productivity are the driving factors in the beef industry and will either make or break the producer.

Make your choice based on facts and data, choose Kallion Farms Brahmans.

200 heifers available for sale by private treaty.
